

## **LEVEL TWO: Advanced Methylation**

Healing breakthroughs have been phenomenal with many health conditions including autoimmune diseases, chronic adrenal and thyroid imbalances, chronic fatigue syndrome, and with emotional challenges such as Bipolar disorder, ADD, ADHD, depression, and anxiety. Our underlying physical and emotional health is greatly determined by our genetic methylation patterns.

### **WHAT WILL BE TAUGHT**

- Advanced test kit introduction and usage: going to the next level
  - Advanced Kit
  - Hormone Kit
  - Allergy Kit
  - Cardiovascular Kit
  - Emotional Kit
  - Super Challenge Kit
  - Supplement Kit
- Advanced Concepts in Genetic Variants in Methylation pathways and their relevance to clinical practice
- Interpreting genetic data using MyHappyGenes Genetic test reports

Dr. J Dunn is one of the pioneers in the application of laboratory genetic testing in clinical practice, she will show you how she is successfully using this information in her waiting list practice. Through her experienced use of lecture, flow charts and manuals she will take a potentially challenging subject to learn and have you ready to implement it into your practice on Monday morning. This course can truly transform your style of practice and increase your clinical outcomes! Dr. Dunn makes a complex topic easy and fun to learn.

**Wholistic Methylation Test Kits will be available for Sale at the seminar. Along with posters, tear off sheets and other practitioner aids. We will be offering special pricing on all materials!**

*Please note: In person courses apply the practical application of the Wholistic Methylation technique and do not constitute the full certification of the online Level 1 & 2 courses.*
